

	<p>ABC MixTalent-Project: Shared Web & Educational Project Macadam MixTalent Webworkshop in Diemen, Holland & Afuaman School in Progress, Afuaman – Ghana</p>
<p>Report by Greet Meesen - Founder & WebCoach</p> <p></p> <p>http://www.macadam.nl</p> <p>Macadam MixTalent WebWorkshop is a private, independent non-profit imitative on behalf of WebEducation Long-term Recovering Students in Europe, Africa, North- and South-America, Australia en Asia</p>	

Open Letter to the Honorable Nii Adjiri Abraham Afua

Honorable Nii Afua,
 We – the students and Teachers of the Macadam MixTalent Webworkshop wish you. the children & young people in Afuaman, the board and the teachers a Happy Children’s Right Year 2009 - 2010. We included your students in the celebration painting we made for this event.

it is a pleasure for us all to work on our shared purpose:

The soul of a school is the learning process of the students and the teaching practice of the teachers

Together with your representative here in Holland, Mr. Sam Carter, this educational box is the first step for our shared ABC-project. We included Mr. Carter in our poster with other representatives:

The AmisAmies Webgroup is a group of students (aged 6-21 yrs) in hospital or recovering at home around the world. They have severe diseases or handicaps and are working in sheltered educational environments. I am the webcoach, teacher, voice and face for those students.

We all are looking forward to a flourishing cooperation with you and your village. All the students, as well yours as mine are working on the project – according to their possibilities and needs. Custom-made to circumstances and means. With this educational ABC-box we are setting the first steps on our MixTalent-path together.

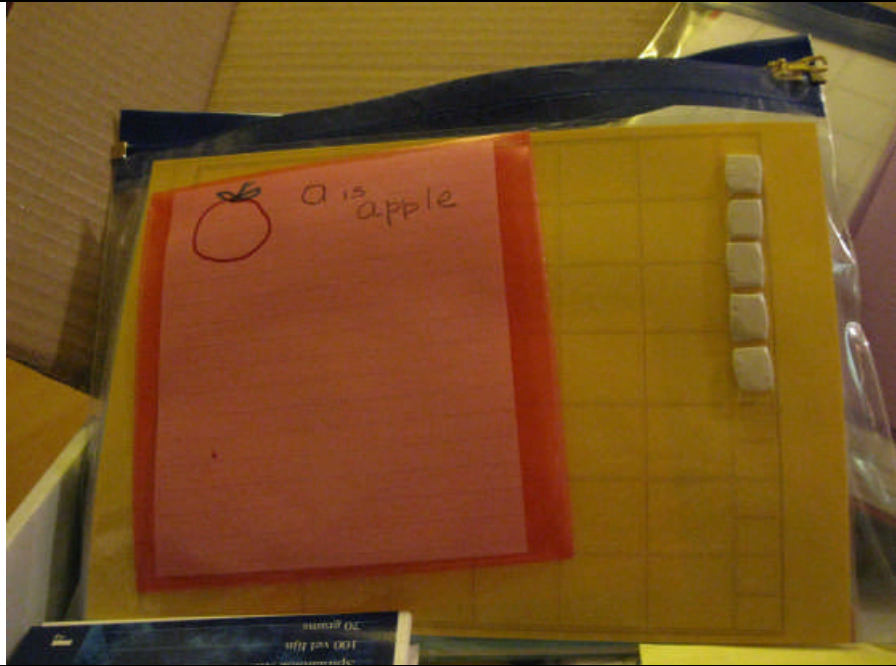

Kind Regards, Greet Meesen

Description of the Afuaman ABC-box

	<p>Reading and Writing are the basics to communicate to a broader world. One doesn't yet to have a schoolbuilding to start this learningprocess. With this box we, Greet & Teamleader Sam, are trying to give you some means to work with the students already.</p>
---	---

Is it possible to send by email or postal-mail the words and drawings of the children, so we can include it in our webproject?

	<p>We have made small plastic boards so children can work with words.</p> <p>They can past the words on the boards with the "gum", Please tell them not to eat it!</p> <p>It is to past</p>
--	---

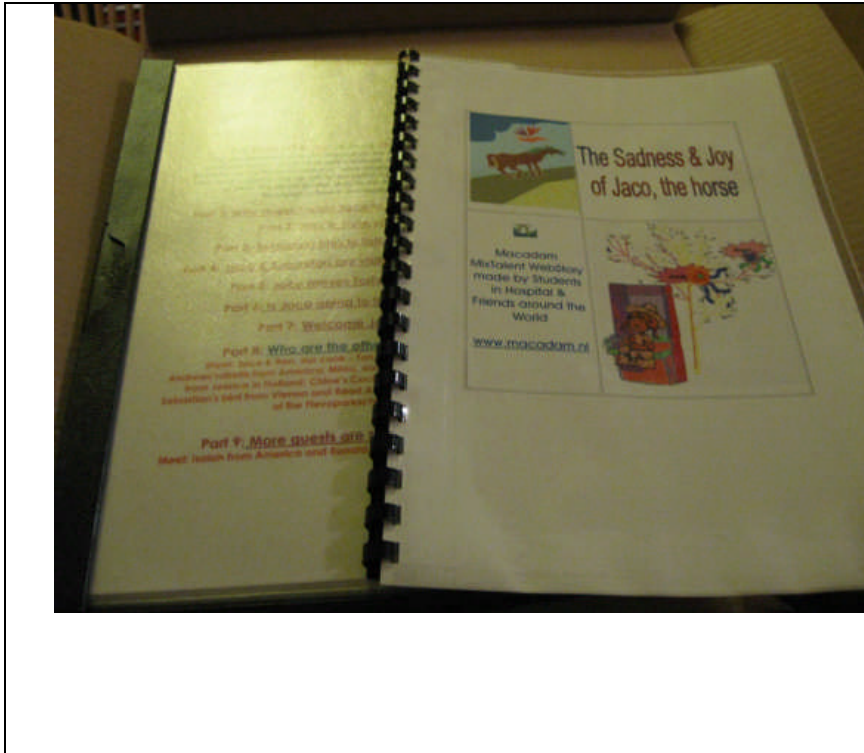

We have made examples of words. The drawings are maybe not so well, but they are just examples to stimulate the students. I am sure the children in Afuaman are able to make beautiful drawings with words

Example how one can make crosswords, Children love that

	<p>Some writing materials</p>
	<p>Story children and teachers made in hospital</p> <p>We made two examples as a booklet</p> <p>And one example plasticized, so several children can read episodes at the same time</p>

Booklet and plasticized example of the story

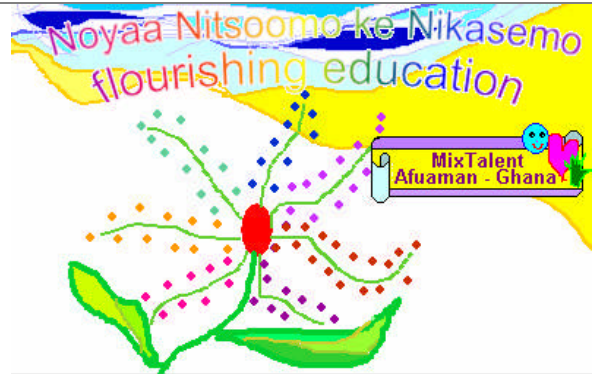

Alexis in the story is my webassistant in the USA, she herself is severe handicapped, and she was my first student 10 years ago, now she is teacher too. Her relatives are originally from Ghana!!!!

Here below we made the description for the ABC-tasks for the children In Afuaman & for the children in hospital. We are trying to combine observation and writing, so children understand from the beginning reading and writing isn't a "technical" or "instrumental" skill, but it is a meaningful tool to discover your own world and sharing that world with others.

Because some of our students are in isolated, medical settings due to their disease they are writing sometime about things they would like to see. I am starting with our students at the end of the alphabet and your students are starting at the beginning. But everybody can choose the word which is important to them. But is just to avoid that we will never end the project!
